This document lists activities that have been approved for Continuing Education (CE) credit by the CE Committee. This list does not include activities sponsored by NCBLG Pre-Approved Continuing Education Providers. See the full list of Pre-Approved Providers on the Board website. The Pre-Approved list is updated periodically. All CE completed through pre-approved providers must be geological in nature. If you participate in an activity offered by a pre-approved provider that you are unsure is sufficiently geological in nature, you are encouraged to make application for approval.

The activities in this document are sorted by date. We recommend that you search the document (Control+F or Command+F) for a keyword if looking for a specific activity. There is a separate list of approved courses that are available on demand or on an ongoing basis, available on the Continuing Ed. page of the Board's website.

This list is to be used as a tool for reporting completed CE to to reduce duplicate applications. While you may use this list to browse for activities that may be of interest to you, that is not its main purpose. It is the responsibility of each individual license to find, attend, and report continuing education as a condition of renewal. If interested in attending an activity found on the approved list, or an activity offered by a pre-approved provider, it is your responsibility to locate contact information. Please do not contact the Board office for assistance in registering for a continuing education activity.
