

**NCBLG Approved Continuing Education Activities
2018-19 License Period (updated January, 2019)**

This document lists activities that have been approved for Continuing Education (CE) credit by the CE Committee. **Please keep in mind that this list does not include activities sponsored by NCBLG Pre-Approved Continuing Education Providers. See the full list of [Pre-Approved Providers on the Board website](#).** This list is updated periodically. All CE completed through pre-approved providers must be geological in nature.

The following entities were recently added to the list of pre-approved providers:

Central New York Association of Professional Geologists (CNYAPG)
ECU Dept. of Geological Sciences Seminar Series (ECU)
Florida Association of Environmental Professionals Annual Conference (FAEP)
Geological Association of New Jersey (GANJ)
NAVFAC Remediation Innovative Technology Seminar (RITS)
New Hampshire Geological Survey (NHGS)
Pennsylvania Council of Professional Geologists (PCPG)

The activities listed in this document are sorted by course approval code, which is reflective of the order in which each activity was submitted for review. We recommend that you search the document (Control+F or Command+F) for a keyword if looking for a specific activity.

Please be aware that the list is to be used as a tool for reporting completed CE and to reduce duplicate applications. While you may browse the list for activities that may be of interest to you, that is not its main purpose. It is the responsibility of each individual licensee to find, attend, and report continuing education as a condition of renewal. If interested in attending an activity found on the approved list, or an activity provided by a pre-approved provider, it is your responsibility to locate contact information. Please do not contact the Board office for assistance in registering for an activity.
